Congratulations! You have successfully completed the Cisco Certified Network Associate (CCNA) certification requirements and you are now Cisco certified.

The Cisco Certified Network Associate (CCNA) certification validates foundational networking, routing, switching, security, and infrastructure management skills.

Congratulations again on your achievement and the ability to claim associated certification benefits, including digital badges and future certification opportunities. To access your certification benefits, explore the "Benefits" section of your Cisco Certification Account.

As a reminder, you are bound by the Cisco Candidate Code of Conduct accepted during certification and are expected to maintain the integrity and confidentiality of examination content. If you have any questions or require assistance, please contact Cisco Support.

Thank you,

Cisco Training and Certification
